Deepanshu Nagar

Profile

Motivated Computer Science student at Krishna Engineering College with a strong foundation in C, HTML, CSS, and Python. Completed a certification in Image Processing with PIL in Python and developed web-based projects, including a Tic-Tac-Toe game and a self-driving car model. Check out my portfolio at [dpanshu.netlify.app]. Seeking an internship to apply and expand technical skills in a real-world setting.

Education

B.Tech (Computer Science), Krishna Engineering College, Ghaziabad

September 2021 — September 2025

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming in Java

(CBSE), P.N.N. Mohan Public School, Ghaziabad

June 2017 — July 2021

Science Stream (PCM)

Technical Skills

- Programming Language: C, Python (Certified in Image Processing with PIL), Java (Basic proficiency through coursework)
- Web Development: HTML, CSS, JavaScript (Developed web applications including a Tic-Tac-Toe game and a self-driving car model)
- Database Management: SQL (Learned database management and query optimization through B.Tech coursework)

Soft Skills

- Communication: Effectively conveyed complex technical concepts during presentations and group projects.
- Teamwork: Collaborated with peers on various group assignments, fostering a cooperative learning environment.
- Problem-Solving: Applied critical thinking to troubleshoot and resolve coding issues in projects.
- Time Management: Balanced academic coursework with personal projects and certifications, meeting deadlines consistently.
- Adaptability: Quickly learned and applied new programming languages and tools through online courses and tutorials.

Extra-curricular activities

Project 1

Tic-Tac-Toe Game Web Application

- Developed a Tic-Tac-Toe game using JavaScript, HTML, and CSS.

- Implemented the game's logic and user interface, improving understanding of web development concepts.

- View the project on my portfolio(https://dpanshu.netlify.app)

- Followed a YouTube tutorial to build the project, demonstrating the ability to learn and apply new skills.

Project 2

Self-Driving Car Model Web Version

- Created a web-based simulation of a self-driving car model using JavaScript.

- Worked on the frontend to visualize the car's movements and interactions within a virtual environment.

-View project on my portfolio(https://dpanshu.netlify.app).

- Project based on a YouTube tutorial, showcasing adaptability in applying online learning resources.

Courses

Image Processing with PIL in Python , Udemy

July 2024 — July 2024
